Atticus H Hainsworth is Reader in Cerebrovascular Disease at St George's University of London, UK. He is an expert in the pathology of cerebral small vessel disease, the primary cause of vascular cognitive impairment. His interests are in the pathological processes that underlie small vessel disease and associated white matter lesions. He has explored pathogenic mechanisms of small vessel disease in human brain tissue derived from large cohorts (primarily the OPTIMA and MRC-CFAS cohorts). He has authored systematic reviews of animal models relevant to VCID.

Dr Hainsworth received his undergraduate training in Natural Sciences from Cambridge University and his PhD in Physiology & Biophysics from Rush Medical Center, Chicago. He was Chief Investigator on the PASTIS trial, testing tadalafil for repurposing in vascular cognitive impairment.
