

**Cyrus Raji, MD, PhD.**

Assistant Professor of Radiology, Mallinckrodt Institute of Radiology, Washington University in St. Louis.

Dr. Cyrus Raji joined the Neuroradiology Faculty and the Neuroimaging Laboratories faculty as an Assistant Professor at the Mallinckrodt Institute of Radiology in July of 2018. He completed his two-year neuroradiology fellowship at UCSF in San Francisco, California where he conducted TBI research and MR imaging of connectomes with Dr. Pratik Mukherjee. His MD/PhD training at the University of Pittsburgh in Pittsburgh, PA and his research focused on the intersection between lifestyle factors and MR imaging biomarkers of brain health including brain structure and perfusion, a research interest he continues to actively engage in. During his time in Pittsburgh, he also was part of the amyloid imaging group at the University of Pittsburgh led by Dr. William Klunk and Dr. Chester Mathis. Dr. Raji also completed a residency in diagnostic radiology at UCLA Medical Center in Los Angeles, California, where he was awarded the 2016 Radiological Society of North America Roentgen Research Award for outstanding contributions in Radiologic Research. He was also a recipient of the 2017 American Society of Neuroradiology Boeger Award Grant for Alzheimer's Imaging research as well as the 2019 Radiological Society of North America Scholar Grant and an NIH K award.

Dr. Raji will give a talk on “*Multi-Modal Neuroimaging of Traumatic Brain Injury and Chronic Traumatic Encephalopathy*”.
