

Adam M. Brickman, PhD

Professor of Neuropsychology, Taub Institute for Research on Alzheimer's Disease and the Aging Brain, Department of Neurology, Vagelos College of Physicians and Surgeons, Columbia University

Adam M. Brickman, PhD is a tenured Professor in the Taub Institute for Research on Alzheimer's Disease and the Aging Brain and in the Department of Neurology at Columbia University. Dr. Brickman's work primarily focuses on understanding the vascular contributions to cognitive aging and Alzheimer's disease by integrating neuroimaging techniques with observational neuropsychological studies, basic neuroscience, and epidemiological approaches. He is also interested understanding sources of racial and ethnic disparity in Alzheimer' disease, developing interventions for cognitive decline in aging, and designing neuropsychological instruments to assess cognition in older adults.

Dr. Brickman completed his undergraduate studies in neuroscience and psychology at Oberlin College, his PhD in psychology/neuropsychology at the City University of New York, his clinical internship at Brown Medical School, and his postdoctoral training at Columbia University, where he has been on faculty since 2007.

Speech Title: White matter hyperintensities are a core feature of Alzheimer's disease: Evidence from late onset and genetic forms
