

**Arjun Masurkar, MD, PhD.**

Assistant Professor of Neurology and Neuroscience & Physiology at the NYU Grossman School of Medicine, and Clinical Core Director of the NYU Alzheimer's Disease Research Center.

As a physician-scientist, Dr. Masurkar combines translational and clinical research methods to study structure-function relationships related to early Alzheimer's disease symptoms as a means to improve biomarkers and treatments. He earned his BS from MIT, MD/PhD from Yale, and completed postdoctoral clinical and scientific training at Columbia.

*Speech Title: Emerging and Overlapping Rules of Hippocampal Cellular Vulnerability between Alzheimer's Disease, Vascular Disease, and Epilepsy.*
